

P255 Filter Regulator Lubricator

PRODUCT DETAILS

- Compressing atmospheric air, which is always humid, results in liquid water in pneumatic circuits. This water must be filtered out to protect the circuit and pneumatic tools.
- For the rest of pneumatic tools used in repair or body shops, an air filter, regulator and lubricator must be used.
- Bowl capacity: 100 ml
- Gauge diameter: 50 mm
- Pressure regulation range: 0.5-10 bar
- Min. temperature +5°C; max. temperature 60°C
- Nominal flow: 3200 std l/min
- Filter size: 20 m
- Air connection: 1/2"
